

ERRATA

The map clearly shows the exit is over there. How can the mapmaker make such an obvious mistake? Anyone got an idea how we get out of here now?

VERSION: JUNE 2009

The following errata is applicable to all books of the first printing, labelled **June 2009** in the **Credits** section. We corrected a number of minor typos as well, but won't list them here to avoid cluttering up the document.

p.298, Step/Action Dice Table: Steps 36-40 are supposed to start with 4d12, not 5d12.

p.298, Result Level Table: The Extraordinary Success columns should always start 1 point higher than the highest Excellent Success listed. The Rule of One reference in the table footer is p. 15 of the **Player's Guide**.
